

Agro PV

Sustainable
crop
protection

+ free electricity

Benefits of agrivoltaics

Energy + protected crops. Save on water and land use

Adaptable for the majority of crops

Reduce water stress and use

Transparent and adjustable tilt angle

Steel structure

Production cycle maximized

Production and performance monitoring

Lower extreme temperatures

Protect your crops and produce free electricity

Shade

- Shield from extreme temperatures
- Maintain the soil's moisture, reducing irrigation
- Microclimate stabilization: elimination of extreme temperatures

Shield

- Protection from the rain, hail, snow, etc.
- Eliminate the need for shade nets and cloths
- Reduce manual labor required for putting up/taking down shade nets/cloths
