10 meters of snow or
a 10,500 Pa load

**Super solid
design**
Ultra-strong 3 + 3 mm
double glass

PV System & Roof

For the Price of Just PV System

It's an outdated myth that the integrated PV roof is too expensive. With SOLITEK SOLRIF, you get both the roof and the solar power plant. At no extra cost.

Nobody wants to hassle with many contractors. Save your clients' time and headaches dealing with both roofers and solar power installers.

Help your customers save twice with the SOLITEK SOLRIF instead. Both on in-roof PV installation and on their utility bills.

Install with Ease and Comfort

Installed the same way as roof tiles – on the battens

Can be installed at 10-70° degrees pitch

Both active and dummy modules can be installed to match the roof coverage proportions nicely

Adaptable design and installation options for non-square roofs
Serves as a roof and generates free electricity

Available in:

Black

The classic, our clients' favorite pick.

Semi-Clear

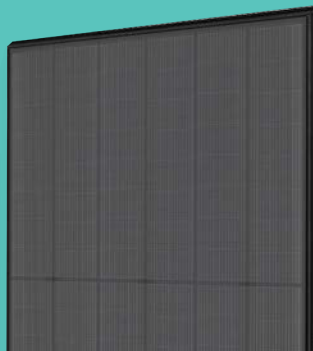

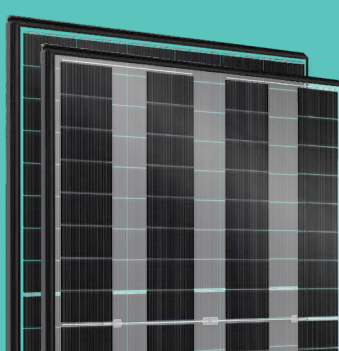

For terraces and spots where some sunlight is needed.

Satin

New technology, non-reflective surface for glare-sensitive areas.

Terracotta

Designed for historical city centers dominated by the classic red tile roofs.

Harness SoliTek SOLRIF for your next in-roof project
